

CAPCON is currently seeking an **Estimator** for our Sacramento California operation.

CAPCON is a structural concrete contractor that works a on variety of construction projects throughout Northern California and Northern Nevada. CAPCON's primary focus is structural concrete projects that have cast-in-place wall, column, and suspended slab formwork that requires extensive planning, CAD detailing, and engineering. Our clients include a varied group of general contractors and concrete contractors working on large scale commercial, multi-family, civil, residential, and mixed-use projects.

### **Responsibilities**

- Prepare structural concrete takeoffs and estimates.
- Review and negotiate Contracts.
- Convert estimates into project budgets.
- Facilitate the transition from estimate to build.
- Perform cost and production analysis on past and complete projects.
- Participate in the promotion and marketing of CAPCON.

### **Qualifications**

- Desire to build.
- Desire to work hard and be part of a collaborative team.
- Civil Engineering or Construction Management degree preferred.
- 3 years of related construction experience.
- Basic knowledge of structural concrete building and engineering principles.
- Ability and desire to work, think and act independently.
- Basic construction scheduling
- Looking for personal and career growth.
- Accurately estimates time required to complete actions and activities.
- Accurately interprets written information associated with projects.
- Strong communication and interpersonal skills
- Strong computer skills
- Ability to meet deadlines.

### **The CAPCON offers competitive wages and benefits, including:**

- Medical, Dental & Vision Insurance
- Vacation Time & Paid Holidays
- Company 401(k) Matching Contributions
- Profit Sharing and Bonus Program
